Akshay YADAV

QA Software Testing Engineer

4 Years of Experience|Automation Test Engineer|Playwright|Performance Testing|Selenium|API Testing

QA Software Test Engineer with 4+ years of experience in Automation, Manual, and Performance Testing, specializing in Selenium (Python) and Playwright. Proven expertise in designing scalable automation frameworks, executing end-to-end test strategies, and integrating test suites into CI/CD pipelines. Adept at functional, regression, API, and performance testing to ensure high-quality, reliable, and high-performing applications.

Akshayyadavchukk14@gmail.com + 91 8500431485

Hyderabad, India

PROFESSIONAL SUMMARY

- Strong understanding of **SDLC & STLC**, including requirement analysis, test planning, test case design, execution, and defect tracking.
- Hands-on experience in **Manual Testing**: Smoke, Functional, Regression, Re-testing, Integration, and System Testing.
- Expertise in **Automation Testing** using **Selenium (Python)** and **Playwright** for UI and end-to-end testing.
- Experience in building and maintaining **automation frameworks** (POM, BDD).
- Good knowledge of **Python programming** with OOP concepts (Inheritance, Encapsulation, Polymorphism, Abstraction).
- Experience working in **Agile/Scrum environments** with sprint-based delivery.
- Hands-on experience in **API Testing using Postman** and validation of REST APIs.
- Basic experience in **Performance Testing using Apache JMeter** (load, stress testing).
- Experience in **CI/CD integration using Jenkins** for automated test execution.
- Strong knowledge of **defect lifecycle management using JIRA**.
- Familiar with **Git/GitHub** for version control and collaboration.
- Experience in Monitoring tools like Dynatrace for performance insights.

TECHNICAL SKILLS

- **Automation & Frameworks:**
  Selenium WebDriver, Playwright (TypeScript/JavaScript), Cucumber (BDD), Page Object Model (POM), Data-Driven Framework
- **AI AUTOMATION:** Zapier, Wrike, Make, ChatGPT, Copilot
- **Programming Languages:** TypeScript, JavaScript, Java, SQL
- **API Testing:** Postman, REST Assured (REST & SOAP), API Validation & Integration Testing
- **CI/CD & DevOps:** Jenkins, Azure DevOps Pipelines, Continuous Integration & Continuous Testing
- **Performance Testing:** Apache JMeter (Load, Stress & Performance Testing)
- **Testing Expertise:** Functional, Regression, Integration, Smoke, Sanity, End-to-End Testing
- **Tools**: JIRA, TestRail, Git, Maven
- **Methodologies:** Agile (Scrum), SDLC, STLC

WORK EXPERIENCE

Tata Consultancy Services (British Telecommunications Group) **August2022-till date**
Systems Engineer

Project: BT E-commerce Platform

RESPONSIBILITIES

- Analyzed **SRS and business requirements** to derive test scenarios and ensure alignment with project objectives.
- Collaborated with developers and cross-functional teams to **identify, track, and resolve defects**, ensuring high-quality deliverables.
- Provided **regular status updates and detailed test reports** to stakeholders for effective project tracking.
- Designed and executed **automation test scripts using Selenium (Python) and Playwright**, improving test coverage and execution efficiency.
- Developed and maintained **scalable automation frameworks using Page Object Model (POM)** for better reusability and maintainability.
- Implemented **Playwright features such as parallel execution, cross-browser testing (Chromium, Firefox, WebKit), and headless testing** to improve execution speed.
- Integrated automation test suites with **CI/CD pipelines using Jenkins and Azure DevOps**, enabling continuous testing and faster feedback cycles.
- Configured automated test execution as part of **build and release pipelines**, ensuring quality gates before deployment.
- Performed **API testing using Postman**, validating request/response, status codes, and data integrity.
- Designed and executed **performance test scripts using Apache JMeter**, simulating real-world load and stress scenarios
- Analyzedperformance metrics such as **response time,throughput, and errorrates** toidentifyandresolve bottlenecks.
- Conducted **Functional, Regression, Integration, and Re-testing** to ensure application stability across releases.
- Logged, tracked, and managed defects using **JIRA**, ensuring timely resolution in collaboration with onsite teams.
- Executed **regression test suites after each build/deployment** to validate application stability.

ACHIEVEMENTS

- Delivered high-quality releases by collaborating with cross-functional teams under tight deadlines.
- Recognized and promoted for consistent performance and contributions.
- Successfully handled a **critical high-priority feature delivery**, ensuring zero major defects in production.

CERTIFICATIONS

- Playwright Automation Testing
- JMeter Performance Testing

EDUCATION

- **Malla Reddy institute of technology.**
  - Bachelor of Technology in Information Technology Engineering (2017-2021).
