PROFESSIONAL SUMMARY

- Computer Science and Engineering graduate with a strong foundation in Java, Data Structures, Spring Boot, MySQL, and full-stack development. Experienced in developing web applications, integrating databases and REST APIs, and performing unit and integration testing through academic projects. Familiar with Git, Maven, Gradle, JUnit, and AWS. A quick learner with strong problem-solving, teamwork, and communication skills, seeking an entry-level Java Developer role to apply technical knowledge and contribute to building reliable and scalable applications.

EDUCATION

KL Deemed to be University — **India**
B.Tech, Computer Science and Engineering; CGPA: 9.38 — *May 2026*

Narayana Junior College — **India**
Board of Intermediate Education; Percentage: 96.3% — *Completed*

Narayana ENB-1 High School — **India**
Board of Secondary Education; Percentage: 99.6% — *Completed*

TECHNICAL SKILLS

Programming Languages: Java, C, JavaScript

Core Concepts: Data Structures, Object-Oriented Programming (OOP)

Frameworks and Web Technologies: Spring Boot, React.js, HTML, CSS, Django

Databases: MySQL(PL/SQL), MongoDB

Tools and Technologies: Eclipse, IntelliJ IDEA, Git, Maven, JUnit, AWS

ACADEMIC PROJECTS

Student Course Management System — **Jan 2023 – Mar 2023**

- Developed a full-stack course management system using React.js, AngularJS, and MongoDB to simplify academic administration.
- Designed an intuitive interface for course enrollment, assignment management, and academic record tracking.
- Created dynamic frontend components using React.js and AngularJS to provide an interactive user experience.
- Integrated MongoDB to organize and retrieve course, student, and instructor information efficiently.
- Collaborated with team members in an Agile environment and used Git for version control and feature integration.

E-Survey Web Application using Django — **Jan 2024 – Apr 2024**

- Developed a web-based survey application using Django and React for collecting and analyzing user feedback.
- Implemented user authentication and role-based access control to support secure access for different user roles.
- Built survey creation, response collection, and reporting features to simplify data analysis.
- Deployed the application using AWS services to support accessibility and reliable performance.
- Configured a CI/CD workflow using GitHub Actions to streamline application testing and deployment.

Interaction between Citizen and Politician — **Feb 2024 – May 2024**

- Developed a full-stack communication platform using Spring Boot and MySQL to facilitate interaction between citizens and local politicians.
- Implemented communication features that enabled citizens to submit concerns and receive responses efficiently.
- Integrated user authentication and messaging functionality to support secure communication.
- Configured cloud deployment on AWS and supported application maintenance and availability.
- Performed unit and integration testing to identify issues and improve application reliability.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — Verify
- **Java Full Stack – Wipro TalentNext** — Verify
